

## PRIPREMA ZA ISPIT ZNANJA TROKUT

**1.** Koliko stupnjeva imaju  $\alpha$  i  $\beta$ ?

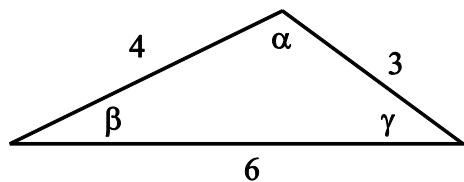

a)

b)

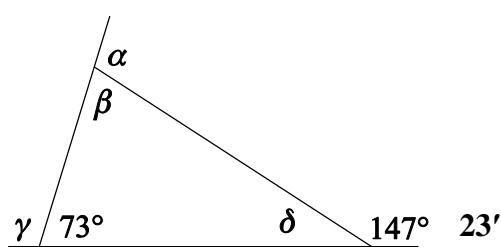

**2.** Poredaj po veličini kutove trokuta.

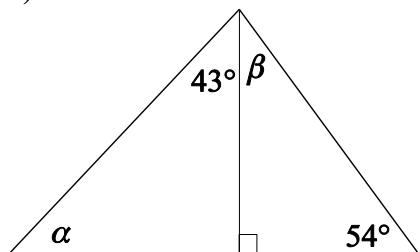

**3.** Koliko stupnjeva imaju  $\alpha$ ,  $\beta$ ,  $\gamma$  i  $\delta$ ?

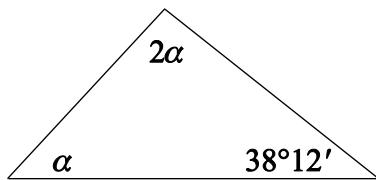

a)

b)

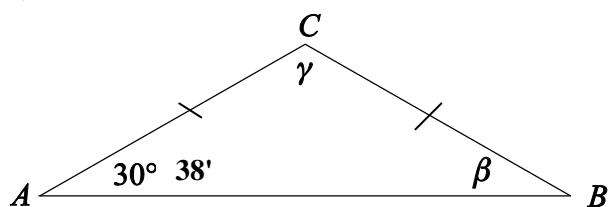

**4.** Odredi veličinu kuta  $\alpha$ .

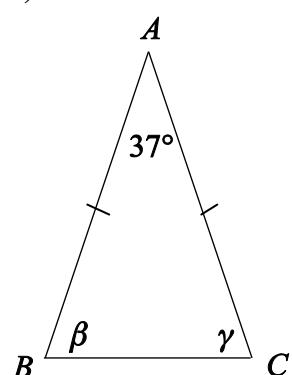

**5.** Odredi veličine nepoznatih kutova  $\alpha$ ,  $\beta$  i  $\gamma$ .

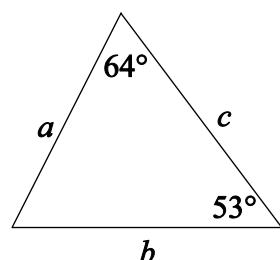

a)

b)

**6.** Poredaj po veličini stranice trokuta.

7. Kut  $\alpha$  je tri puta veći od kuta  $\gamma$ , a kut  $\beta$  je za  $20^\circ 15'$  veći od kuta  $\gamma$ . Odredi veličine unutarnjih kutova trokuta.
8. Konstruiraj kut od a)  $45^\circ$  b)  $75^\circ$ .
9. Izračunaj površinu trokuta ako je duljina stranice  $a = 5.7$  cm, a duljina njoj pripadne visine  $0.68$  dm.
10. Nacrtaj jednakokračan tupokutan trokut i njegove visine. Odredi ortocentar.

11. Izračunaj nepoznatu veličinu trokuta:

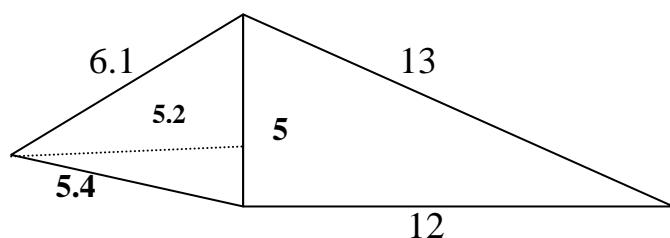

$$a = 3.8 \text{ cm}, \quad v_a = 4.2 \text{ cm}, \quad b = 4.8 \text{ cm}, \quad v_b = ?$$

12. Konstruiraj trokut zadan elementima  $c = 5$  cm,  $\alpha = 60^\circ$ ,  $\beta = 90^\circ$  i opiši mu kružnicu.

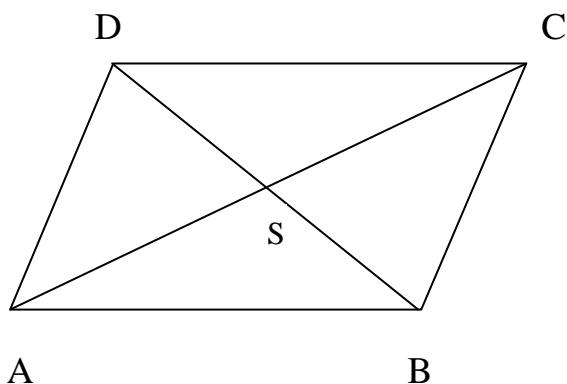

13. Konstruiraj trokut zadan elementima:

$$|AB| = 7.2 \text{ cm}, \quad |AC| = 5.3 \text{ cm}, \quad |\angle A| = 45^\circ \text{ i upiši mu kružnicu.}$$

14. Izračunaj opseg i površinu lika sa slike.

15.

Dokaži da je  $\Delta ABS$  sukladan  $\Delta SCD$  i da je  $\Delta BCS$  sukladan  $\Delta ASD$ .
